in shirt waists Now for a complete clearance of the entire stock of ladies' shirt waists! We have cut clear into the cost-for we are willing to lose if we can have them disposed of when

the end of the season arrives. Our determined efforts bring you face to face with the greatest shirt waist values you've ever known. You can see at a glance what bargains they are-how much greater than what others are offering.

We've divided them in two lots-and you may take your pick of the first-which consists of a great variety of India linon, lawn, percale and madras shirt waists-with newest style collars and cuffs-made with pointed yoke backs-which have sold as high as a doller-for

29 cents.

You may take your pick of the second lot, which consists of all our high-class shirt waists of lawn, batiste, slik and satin-striped grass linen and linen-colored lawn-most of htem have plain white detachable linen collars—the most attracfor as high as \$2-for

40 cents.

\$5 Wash Suits to go for \$1.40! Seems almost incredible-

but it's entirely true. They're the same wash suits we have had to ask \$5 for-and which you've paid others \$7 for— but they come to us this late in the season at a great sacrifice. They are fine crashespiques — and ducks — suits made for this season's trade tailored in admirable fashion -perfectly made.

Some of them are trimmed with wide braid—some with parrow featherbone braid—some are trimmed with straps of sateen -some of the piques are trimmed with duck of all colors some of the crashes have trimmings of pique—while most of the linens are trimmed with linen-colored lace. They're in blazer and reefer effects. Choice for \$1.40 each.

Many Drowned at Kertch A special dispatch from St. Petersburg says that the Novosti estimates that at least one hundred and fifty persons have perished in the recent floods at Kertch in the Crimea. JAPANESE WARSHIPS.

A Powerful Fleet to Be Built in England, Germany and France. Word comes to the Navy Department from England that the Japanese government has arranged for the construction of a powerful fleet of vessels in England, Germany and France. According to this information some of the new vessels are to be battle ships of the first class, equal in power to the best in other navies, while others are to be torpedo boats of the latest design. It is reported that the Fugi and the Yashima, two fine warships ordered just after the close of the war with

dered just after the close of the war with China, are nearly ready for commission, and will soon be sent to Japan.

A first-class battle ship, the Shikisma, of 15,000 tons displacement and 14,000 horse power, is now building in Great Britain, and is to be delivered in two years. In her class, the report states, she will probably have no superior affoat. Another ship of her type has lately been ordered and is to be undertaken at once.

Clydebank and Stettin have also received orders for two powerful battle ships of equal displacement and fighting power.

An immense cruiser, of 14,350 tons displacement and 15,500 horse power, is to be completed this year at Clydebank, while two thirty-knot torpedo destroyers are being built by the Thornycroft and four at Yarrows. A German firm has also received an order to build fire the street was a street.

ing built by the Thornycroft and four at Yarrows. A German firm has also received an order to build five twenty-four-knot torpedo boats, and five are also to be built at Havre. This fleet of warshies is far larger than that now building for the United States.

LIKE THE BROOKLYN.

England Getting Estimates for Fou Swift Armored Cruisers.

Information has reached the Navy De partment that the British naval authorities have caused supplemental estimates to be prepared for the construction of four first-class swift armored cruisers of 11,850 tons displacement, similar in general design to the U.S.S. Brooklyn and New York The first lord of the admiralty is credited with saying that the new ships have been made necessary by the presence of fleet armored ships both in Europe and the United States, while the British service has non-States, while the British service has none of this class equal to the Brooklyn. The British navy has heretofore relied upon its second-class hattle ships to fill the gap between battle ships and protected cruisers. While these ships are well protected and armed, yet they lack, Chief Naval Constructor Hichborn says, the speed of fast armored cruisers like the Brooklyn. The latter vessel, with full coal supply, has a displacement of 10,150 tons; the new British ships are to have 11,850 tons. This will mean, he says, slightly more armor, prehaps, and a larger coal supply.

. Auditor Castle Objects.

The auditor of the Post Office Depart ment has filed an objection to the quarters which have been assigned him and his force in the new city post office building, and this will be considered by the Secretary. this will be considered by the Secretary. The supervising architect will make a report on the protest. The chief objection of Auditor Castle is that his own office and that of his employes will be too much separated. Mr. Castle's office was fixed on the second floor. His working force was given the offices on the eighth floor and part, of those on the seventh. Mr. Castle also complains that he has not been allowed sufficient space. Applications for Place.

Another Contribution to the Air Motor

Controversy. The Eckington Railroad Company, through Receiver Schoepf, late Saturday afternoon submitted a reply to the report of the Enzineer Commissioner concerning the operation or the air motor. After careful consideration of the reply Commissioner Black is still dissatisfied with the proof furnished by the company that the air motor is satisfactory motive power for the road, and the company will be given another and final opportunity of furnishing the necessary

evidence. In the report furnished Saturday the receiver submits a letter from H. H. Vreeand, president of the Metropolitan Stree Railway Company, testifying to the satis-factory operation of the air motor in New York. The report continues, criticising the report of the engineers, and considerable space is devoted to refuting the charge of the expense necessary for the introduction

There is little new in the report, it being made up mostly of former arguments in favor of the air motor.

Two Slight Fires. An alarm was turned in late yesterday

from box 17 for fire in the old District building on 4½ street. The building is occupied by Marcus Notes, and the fire was caused by the explosion of a coal oil lamp It is thought the damage amounted to not more than \$25. An hour earlier there was an alarm turned in for fire on the roof of the clothing house of Mr. A. Herman, corner of 7th and H streets. This blaze is supposed to have been caused by an electric light wire. The damage amounted to about \$150.

In Memoriam

WH.D. In loving remembrance of our dear friend,
WH.J.AM R. WH.D., who was drowned one
year ago today, August 2, 1996.
Through suffering he breathed no murmur,
For the Comforter stood by his side.
And whispered, "Fear not, I am with thee;
With me thou shalt ever abide."
We saw him fade and gently sink;
O'er the river the pale bontman hastened.
We heard the soft dip of his oar;
Then from earth and its sorrows he bore him
Across to the beautiful shore.

BY HIS FRIENDS.
